

## Bauer: Irrigation Technology for the Future

**Bauer** has been working in irrigation technology for more than 83 years and is therefore the oldest irriga-

**Bauer's products are sold through sales subsidiaries and distributors in 80 countries of the world**

Arab Water World (AWW)

tion business in the world. Based on this experience, the company produces irrigation and waste water machines like pivot systems, Rainstars, pumps, sprinklers, pipes, separation technology, pumping and agitation technology at 8 locations. The products are sold through sales subsidiaries and distributors in 80 countries of the world. Highest quality, innovative spirit as well as service and client orientation have always been the guiding principles of the **Bauer Group**. With the world famous HK-coupling the company has established itself with solid set sprinkler systems in the Arab countries. In 1970, Bauer was introduced as one of the first companies the revolutionary, automatic hose reel irrigator, which up until now has a fixed place in the mobile automatic irrigation. In the mid-70's the company worked intensively on the development of a fully automatic pivot-irrigation system. Once again, the company proved its innovative capacity with several new product developments, like the Centerliner, linear systems etc. Water saving irrigation management, easy to operate GPS-control units and the newly developed system 9000 again demonstrate the innovative capacity. Since its foundation in 1930, the Bauer Group - headquarters in Voitsberg, Styria, has been focused on irrigation and slurry management technology. ■
